

# Module 1 - Front-End Web Development

## HTML/CSS Exercise

---

### Overview

Create a responsive contact form and schedule table with modern styling and interactive elements.

### Instructions:

#### 1. Create two files:

- contact.html
- style.css

#### 2. HTML Requirements:

- Create a contact page with:
  - Header section
  - Contact form section
  - Schedule table section
- Form should include:
  - Name input
  - Email input
  - Phone input
  - Subject dropdown
  - Message textarea
  - Submit button
- Table should include:
  - Available appointment times
  - At least 5 rows and 3 columns

#### 3. CSS Requirements:

- Form styling:
  - Input fields:
    - Width: 100%
    - Padding: 12px
    - Border: 1px solid #ddd
    - Border radius: 4px
  - Labels:
    - Block display
    - Margin bottom: 8px
  - Submit button:
    - Background: #2196F3
    - White text

- Padding: 12px 24px
  - Hover effect
- Table styling:
  - Striped rows (#f9f9f9 for even rows)
  - Bordered cells
  - Hover effect on rows
  - Responsive design (horizontal scroll on mobile)
- Layout:
  - Maximum width: 800px
  - Centered on page
  - Responsive padding
  - Proper spacing between sections

#### **4. Add appropriate focus states for form elements**

#### **Submission:**

After completing your code, upload your files to the LMS. Display the webpage in your browser and demonstrate your working solution to your lecturer for review.
